Re: Patent Application for Kaster Date: April 23, 2001  
 Serial 09/100,516\* Art Unit: 1638  
 No.:  
 Filed: June 19, 1998 Examiner Dr. Gary Benzion  
 :  
 For: Plants and Their Preparation Action: Amendment

To: The Commissioner of Patents and Trademarks, Washington, DC 20231

Dear Sir:

To clarify how the amendments were made the applicant provides the following:

Claim one was amended as follows:

FAX RECEIVED  
 APR 23 2001  
 GROUP 1600

1. ( twice amended) A method of producing a plant which shows herbicide resistance, [to a herbicide] said method comprising:
  - (i) applying said herbicide to a population of [herbicide resistant] plants, which show segregating resistance to said herbicide in their pollen, such application being at an advanced vegetative state before flowering; wherein the applied herbicide effectively inhibits the pollen lacking the herbicide resistance; such that during flowering such pollen from said plants fertilize[s] the female plant parts with said pollen;
  - (ii) obtaining herbicide resistance progeny therefrom as seeds and optionally as plants.

Remarks

The newly typed claims are attached hereto as a separate sheet. It is requested that the Examiner allow the claims based on the amendments made to claim one.
